

Response to SDEIS for Phase I and DEIS for Phase II by Robert C. Strasburg II

Supplemental DEIS for Phase I - January 19, 2007

Environmental:

My response to the environmental impact relative to Phase I is one of utter protest. Because we have tried to attain copies of the Bagdon Environmental Impact Report done for the Town and have been illegally denied access to this report, I am left without the data to make an accurate analysis of this projects environmental impact and you will be held responsible for such illegal activity in the courts.

Economic:

My response to the SDEIS is again protest. The developer has not provided your constituents with credible information relative to even a proposed estimate of income potential from tax revenue in any fashion; therefore to comment with anything other than protest would be ignorant on my part.

Property Value:

The developer has not provided any unbiased credible studies on this subject and the only comment I have is again, protest due to lack of information.

Regulation:

In my opinion, the Town Board is currently demonstrating malfeasance for failing to oversee the enforcement of our current zoning laws. Given that fines are long since due from UPC for illegal activity relative to the installation of their test tower on Pine Hill, and an obvious unwillingness on your [part to discipline the developer by pursuing these fines for wrong behavior, you the Town Board are demonstrating that you are not at a mature governmental level worthy to be entrusted with the responsibility of such a project in our Town. If you are unwilling to enforce our current laws, what would make us think you will have any interest in controlling this developer and deterring any other illegal activity they intend?

You as a Town Board have lied to us from the start of this project. I have recorded on DVD at various Town meetings where you repeatedly have promised answers to written question and in fact stated that we would probably have them by December of 2006. When do you think it would be appropriate to provide these answers? After these towers are up? We should have had these answers before the last public hearing.

My commitment to each of you tonight is to do all I can to defeat your upcoming election this November. Your government related behavior is not worthy of your office.
